Topic	Page
SERCOS Interface Modules	3
Analog Motion Modules	5

The controller can control servo drives through these motion interfaces.

Application	Catalog Number
Rockwell Automation SERCOS interface drives	1756-M16SE
	1756-M08SE
	1756-M03SE
SERCOS interface drives that are Extended Pack Profile compliant	1756-M08SEG
Analog servo interface drives with quadrature feedback	1756-M02AE
Analog hydraulic servo interface drives LDT feedback	1756-HYD02
Analog servo interface drives with SSI feedback	1756-M02AS

Some servo drives are supported through communication interface modules. The controller can communicate with these servo drives over these networks.

Drives ⁽¹⁾	EtherNet/IP	ControlNet	DeviceNet	Universal Remote I/O	RS-232 Serial	DH-485
2098 Ultra3000 DeviceNet servo drive	No	No	Yes	No	No	No
2098 Ultra5000 intelligent positioning	No	No	Yes	No	Yes	No

⁽¹⁾ Each drive has different options you order for its supported communication networks. See the appropriate catalog or selection information for a drive to make sure you select the appropriate option when specifying a drive for a specific network.

For more information, see the Motion Analyzer CD to size your motion application and to make final component selection. Download the software from <http://www.ab.com/motion/software/analyzer.html>

Important User Information

Solid state equipment has operational characteristics differing from those of electromechanical equipment. Safety Guidelines for the Application, Installation and Maintenance of Solid State Controls (publication [SGI-1.1](#) available from your local Rockwell Automation sales office or online at <http://www.rockwellautomation.com/literature/>) describes some important differences between solid state equipment and hard-wired electromechanical devices. Because of this difference, and also because of the wide variety of uses for solid state equipment, all persons responsible for applying this equipment must satisfy themselves that each intended application of this equipment is acceptable.

In no event will Rockwell Automation, Inc. be responsible or liable for indirect or consequential damages resulting from the use or application of this equipment.

The examples and diagrams in this manual are included solely for illustrative purposes. Because of the many variables and requirements associated with any particular installation, Rockwell Automation, Inc. cannot assume responsibility or liability for actual use based on the examples and diagrams.

No patent liability is assumed by Rockwell Automation, Inc. with respect to use of information, circuits, equipment, or software described in this manual.

Reproduction of the contents of this manual, in whole or in part, without written permission of Rockwell Automation, Inc., is prohibited.

Throughout this manual, when necessary, we use notes to make you aware of safety considerations.

WARNING

Identifies information about practices or circumstances that can cause an explosion in a hazardous environment, which may lead to personal injury or death, property damage, or economic loss.

IMPORTANT

Identifies information that is critical for successful application and understanding of the product.

ATTENTION

Identifies information about practices or circumstances that can lead to personal injury or death, property damage, or economic loss. Attentions help you identify a hazard, avoid a hazard, and recognize the consequence.

SHOCK HAZARD

Labels may be on or inside the equipment, for example, a drive or motor, to alert people that dangerous voltage may be present.

BURN HAZARD

Labels may be on or inside the equipment, for example, a drive or motor, to alert people that surfaces may reach dangerous temperatures.

SERCOS Interface Modules

The SERCOS interface modules use a single, digital fiber-optic link, which eliminates as many as 18 digital wires per axis. Detailed drive-status information can be sent from drive to controller and from controller to drive.

The SERCOS interface modules can connect to these servo drives:

- 2093 Kinetix 2000 multi-axis servo drive
- 2094 Kinetix 6000 multi-axis servo drive
- 2099 Kinetix 7000 high-power servo drive
- 2098 Ultra3000 SERCOS servo drive

Analog Motion Modules

The ControlLogix family of analog servo modules is a cost effective option for closed-loop or open-loop motion control of devices that support an analog motion interface. The analog servo modules provide a $\pm 10V$ analog output-command reference and support a variety of position feedback devices. As many as two axes can be controlled per module, and multiple modules can be used to provide as many as 32 axes of control per ControlLogix controller.

Output load, min	—	100 Ω min	100 Ω min
Transducer	—	Must use External Interrogation signal	Binary or gray code
Clock frequency	—	—	208 kHz or 625 kHz
Registration Input Type	Optically isolated, current sinking		
24V on-state voltage, min	18.5V DC		
24V on-state voltage, max	26.4V DC		
24V off-state voltage, max	3.5V DC		
24V input impedance	9.5 kΩ	1.2 kΩ	9.5 kΩ
5V on-state voltage, min	3.7V DC		
5V on-state voltage, max	5.5V DC		
5V off-state voltage, max	1.5V DC		
5V input impedance	1.2 kΩ	9.5 kΩ	1.2 kΩ
Response time (position latched)	1 μs	1 servo update period ⁽¹⁾	1 servo update period ⁽¹⁾
Other Input Type	Optically isolated, current sinking		
Input voltage, nom	24V DC		
On-state voltage, min	17V DC		
On-state voltage, max	26.4V DC		
Off-state voltage, max	8.5V DC		
Input impedance	7.5 kΩ		

⁽¹⁾ Servo update period is the period at which the position and/or velocity feedback is sampled and a new servo loop is closed to generate a new servo output. The time of this period is a user-defined setting from 250...2000 μs.

Rockwell Automation Support

Rockwell Automation provides technical information on the Web to assist you in using its products. At <http://www.rockwellautomation.com/support/>, you can find technical manuals, a knowledge base of FAQs, technical and application notes, sample code and links to software service packs, and a MySupport feature that you can customize to make the best use of these tools.

For an additional level of technical phone support for installation, configuration, and troubleshooting, we offer TechConnect support programs. For more information, contact your local distributor or Rockwell Automation representative, or visit <http://www.rockwellautomation.com/support/>.

Installation Assistance

If you experience an anomaly within the first 24 hours of installation, review the information that is contained in this manual. You can contact Customer Support for initial help in getting your product up and running.

United States or Canada	1.440.646.3434
Outside United States or Canada	Use the Worldwide Locator at http://www.rockwellautomation.com/support/americas/phone_en.html , or contact your local Rockwell Automation representative.

New Product Satisfaction Return

Rockwell Automation tests all of its products to ensure that they are fully operational when shipped from the manufacturing facility. However, if your product is not functioning and needs to be returned, follow these procedures.

United States	Contact your distributor. You must provide a Customer Support case number (call the phone number above to obtain one) to your distributor to complete the return process.
Outside United States	Please contact your local Rockwell Automation representative for the return procedure.

Documentation Feedback

Your comments will help us serve your documentation needs better. If you have any suggestions on how to improve this document, complete this form, publication [RA-DU002](#), available at <http://www.rockwellautomation.com/literature/>.
